

Privacy Policy

Persistent AI

Effective Date: May 11, 2026

1. Introduction

Persistent AI ("we," "us," or "our") operates the website persistentai.org and associated services, including FireFlow, the PersistentAI demo platform, and related developer tools (collectively, the "Services"). This Privacy Policy explains how we collect, use, disclose, and safeguard your information when you visit our website or use our Services.

By accessing or using our Services, you agree to the terms of this Privacy Policy. If you do not agree, please discontinue use of the Services.

2. Information We Collect

2.1 Information You Provide Directly

We may collect personal information you voluntarily provide, including:

- Contact information (name, email address) when you reach out via our "Get in touch" form or other communication channels
- Account credentials if you register for the PersistentAI demo platform or FireFlow
- Communications you send to us, such as support requests or feedback

2.2 Information Collected Automatically

When you use our Services, we automatically collect certain technical data, including:

- Log data: IP address, browser type, operating system, referring URLs, pages visited, and timestamps
- Usage data: features accessed, agent configurations created, workflow interactions
- Device identifiers and browser cookies or similar tracking technologies
- Telegram Mini App (TMA) data if you use PersistentAI through Telegram, subject to Telegram's own privacy practices

2.3 Information from Third Parties

If you connect third-party AI model providers (such as OpenAI, Anthropic, Google, or DeepSeek) or external services to your agent workflows, those providers may share usage data with us as needed to facilitate the integration. We also receive analytics data from services such as GitHub and Substack when you interact with our linked content.

3. How We Use Your Information

We use the information we collect for the following purposes:

- To provide, operate, and maintain the Services
 - To process and execute AI agent workflows you configure
 - To enable durable execution, checkpointing, and state persistence for your agent sessions
 - To facilitate the marketplace, including agent listing, micropayments via the x402 protocol, and NFT-based agent ownership
 - To communicate with you about updates, new features, and technical matters
 - To monitor and analyze usage trends to improve our Services
 - To detect, prevent, and respond to security incidents, fraud, or abuse
 - To comply with legal obligations
-

4. AI Agent Data and Workflows

PersistentAI is an orchestration platform. When you build and run AI agents:

- Workflow data (inputs, outputs, checkpoints, execution history) is stored to enable durable execution and replay features. This data may include any content processed by your agents.
- Memory data (conversation history, facts, skills) stored via our built-in primitives (LanceDB, LakeFS, DuckDB) is associated with your account and retained for the duration of your use.
- Agent interactions routed to third-party AI models (OpenAI, Anthropic Claude, Google Gemini, etc.) are subject to those providers' privacy policies. We transmit only the data necessary to fulfill your configured requests.

We do not use the content of your agent workflows to train our own AI models without your explicit consent.

5. Cookies and Tracking Technologies

We use cookies and similar technologies to authenticate sessions, remember preferences, and gather analytics. You may control cookie behavior through your browser settings; however, disabling cookies may affect the functionality of our Services.

We may use third-party analytics services (such as Google Analytics or similar) that collect anonymized usage data. These services operate under their own privacy policies.

6. Sharing and Disclosure of Information

We do not sell your personal information. We may share information in the following limited circumstances:

- Service providers: We engage trusted third parties to perform functions on our behalf (hosting, payment processing, analytics). These parties access information only as necessary and are bound by confidentiality obligations.
 - Marketplace participants: If you publish an agent to the marketplace, certain metadata (agent name, description, pricing) is visible to other users.
 - Blockchain and on-chain activity: If you mint an agent as an NFT or conduct transactions via the x402 protocol or blockchain integrations, certain information will be publicly recorded on the relevant blockchain network.
 - Legal requirements: We may disclose information when required by law, court order, or governmental authority, or to protect the rights, property, or safety of Persistent AI, our users, or the public.
 - Business transfers: In the event of a merger, acquisition, or sale of assets, your information may be transferred as part of that transaction.
-

7. Data Retention

We retain your personal information and workflow data for as long as your account is active or as necessary to provide the Services. Checkpointed execution data is retained to support replay and time-travel debugging features. You may request deletion of your data at any time (see Section 10). Certain data may be retained longer where required by law or for legitimate business purposes such as fraud prevention.

8. Security

We implement industry-standard technical and organizational measures to protect your information against unauthorized access, loss, or misuse. PersistentAI's FireFlow architecture is designed with security in mind, as described in our AI Agent Security Architecture documentation. However, no method of transmission over the internet or electronic storage is completely secure, and we cannot guarantee absolute security.

9. International Data Transfers

Our Services are operated globally. If you are located outside the country where our servers are based, your information may be transferred to and processed in a jurisdiction with different data protection laws. By using the Services, you consent to such transfers. Where required, we implement appropriate safeguards (such as standard contractual clauses) for cross-border transfers.

10. Your Rights and Choices

Depending on your jurisdiction, you may have the following rights regarding your personal information:

- Access: Request a copy of the personal information we hold about you

- Correction: Request correction of inaccurate or incomplete information
- Deletion: Request deletion of your personal information, subject to legal retention requirements
- Portability: Request transfer of your data in a machine-readable format
- Objection or restriction: Object to or request restriction of certain processing activities
- Withdrawal of consent: Where processing is based on consent, withdraw consent at any time

To exercise any of these rights, please contact us using the information in Section 13. We will respond within the timeframe required by applicable law.

11. Children's Privacy

Our Services are not directed to individuals under the age of 16. We do not knowingly collect personal information from children. If you believe we have inadvertently collected information from a minor, please contact us and we will promptly delete it.

12. Third-Party Links and Integrations

Our website contains links to third-party sites and integrations (including GitHub, Substack, X/Twitter, and Telegram). This Privacy Policy does not apply to those services. We encourage you to review the privacy policies of any third-party services you use in connection with PersistentAI.

13. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. When we do, we will revise the "Effective Date" at the top of this document. For material changes, we will provide notice through our website or by direct communication where feasible. Your continued use of the Services after the effective date of the revised policy constitutes your acceptance of the changes.

14. Contact Us

If you have questions, concerns, or requests regarding this Privacy Policy or our data practices, please contact us at:
